Ecoclean: focus on high-purity applications, medical technology and service

Ecoclean is responding to the changing requirements in industrial parts cleaning with greater diversification of its product and service portfolio. Thus, in addition to cleaning equipment and systems for classic tasks in various industries, optimally adapted solutions for high-purity applications, for example components for DUV and EUV technology, for vacuum technology systems (UHV, XHV, UCV), and precision optics are the focus of the company's trade fair presentation at this year's parts2clean (hall 4, booth C26). Furthermore, turnkey solutions for cleaning and sterile packaging of medical devices in compliance with MDR and FDA requirements will be featured. Among other things, the Customer Service Station will provide information on future-oriented service, the service app, and ways to make cleaning more energy efficient.

Ecoclean at parts2clean, Hall 4, Booth C26

SBS Ecoclean Group

The SBS Ecoclean Group develops, produces and markets forward-looking machinery, systems and services for industrial part cleaning and surface treatment applications. These solutions, which are among the best in the world, help companies around the globe to manufacture their products efficiently and sustainably in high quality. Customers come from the automotive and supplier industry, as well as the broad industrial market - from medical, micro and precision engineering through mechanical engineering and the optical industry to power engineering and the aviation industry. Ecoclean's success is based on innovation, cutting-edge technology, sustainability, customer proximity, diversity and respect. The Group has twelve locations in nine countries throughout the world and employs more than 900 people.

Thank you very much in advance for sending us a voucher copy or publication link.
